1. The Mission

\$tar Coin is a BEP-20 token designed to be an inclusive platform for those looking to diversify their investments, while at the same time gaining unprecedented access to celebrities, exclusive networking events, vacations, once in a lifetime (OIL) experiences across the globe, and a convivial community committed to the edification of one another. \$tar Coin enables community members to commune and uplift individuals of similar mindsets, life and career aspirations. We are determined to utilize \$tar Coin via Binance Smart Chain and the \$tar Coin app as means to bypass gatekeepers that entrepreneurs, entertainers, influencers, and brand ambassadors alike are limited by. In creating this platform, we will allow members of the \$tar Coin community access to these opportunities, regardless of where they reside, taking the power back from the old guard, one coin at a time.

Unlike other coins available, \$tar Coin was created with four primary intentions:

- 1: To create a token that provides widespread access to the world of VIP and celebrity, creating a path for the public to access a previously out of reach echelon of society.
- 2: To create a token that can be an alternative form of payment to FIAT currency, especially in the entertainment industry.
- 3: To create a token that rewards and incentivizes purchasers for holding.
- 4: To create a community that shares unique, exciting experiences together, escaping the ordinary.

Operating on Binance Smart Chain offers many benefits and allows us to provide a user-friendly experience without requiring great technical knowledge. As it is EVM-compatible, many Ethereum tools and Dapps are able to work with BSC. While no system is perfect, Binance Smart Chain provides reliable and considerate administration of cryptocurrency.

2. Mindset

\$tar Coin's developers, coming from an entertainment background, saw a need for alternative pathways to success in industries such as entertainment. \$tar Coin offers that solution by creating a professional network between its holders through the functional allocation of digital assets. Holding these assets offers

entry to exclusive events, direct connection to celebrities and entrepreneurs, networking opportunities, and access to luxury experiences.

The inception of Bitcoin back in 2008 paved the way for currencies like ours to blossom and improve on the established tracks of this new economy. While Bitcoin is still the industry leader, Binance Smart Chain is a clear contender for the most future-proof cryptocurrency seen so far. Utilizing that as the basis for \$tar Coin has allowed us to delve deeper into why we needed to create this currency. As part of an ever-evolving digital economy, it was important for \$tar Coin to stand out, hence the utilization of the coin as an entry pass to an exclusive platform: our app that serves as a wallet, method to claim perks, RSVP for events, “match” and network with other members. Coin owners will have access to experiences, celebrities, opportunities, events, and connection pools that have yet to be seen in the cryptocurrency realm. By creating this coin we aim to create for our future users an incredibly valuable community with which to build their respective businesses and network with like-minded individuals, all while having exclusive opportunities to enjoy A-List experiences.

We encourage all token holders to commune, network, edify one another and to trade tokens openly. The \$tar Coin community is meant to be a family and we desire to uplift all members, see them uplift each other, help each other and better each other. The founders have committed to locking 2,205,000 tokens of the 6,000,000 minted to encourage both sustainability and trust. No new tokens will ever be minted, no tokens will ever be burned.

3. Perk Tiers

A variety of perks, experiences and opportunities become available to users contingent on holding certain amounts of tokens for a minimum of 1 month:

Basic - 1 Token

As we grow as a community and build upon our foundations, we endeavor to continually seek out new benefits and perks to offer community members, in addition to improving upon current perks and benefits offered.

4. \$tar Coin and BEP-20 Standard

BEP-20 is a token standard run on Binance Smart Chain; it is able to extend ERC-20 protocol, Ethereum token standard, to facilitate cross chain transfer. Akin to both ERC-20 and BEP2, BEP-20 protocol offers all the basic functionalities expected from a token (ie. transfer, utilization by Dapps, listable by decentralized exchanges) in addition to being compatible with ERC-20 and BEP2 protocols.

Binance Smart Chain is backed by an alternate form of Proof-of-Stake consensus algorithm: *Proof of Staked Authority*. Operating even quicker than Ethereum, PoSA is able to perform a 3-second average block time. In this form of Proof-of-Stake validators must stake BNB coins in order to secure the network and then receive a fee on transactions involving the blocks they had validated.

\$tar Coin has a fixed supply of tokens with consideration of the commitment to create a limited and stable number of community members and also our commitment to sustainably being able to provide the benefits advertised to token holders. Consisting of 6 million tokens, of which 16.6666% (1,000,000) will be made available to the public upon launch of the ICO. While this may seem like a large amount, it would only allow a maximum of 1,000 people to be LUX members, a maximum of 2,000 people to be PREMIER members, a maximum of 10,000 people to be VIP members (the recommended minimum membership level) or a maximum of 100,000 people to be exclusive members.

At a time that is deemed necessary, based on demand, more coins will be made available to the public for the prosperity of the community and sustainability of \$tar Coin. While \$tar Coin token ownership offers access to an exclusive community, it is also inclusive in that nigh anyone is able to purchase the single token it takes to be considered a community member regardless of nationality, race, gender identity, sexuality, religious or political beliefs.

5. Soft Cap and Hard Cap

The Hard Cap for the ICO is set at 1,00,000 tokens, yet 4.5 million tokens will be reserved to be released to the public incrementally over time; this design is to entrust the majority of the coin to \$tar Coin community members, allowing the apes to own the majority of tokens should they choose. This ties in to and embodies our philosophy on community, membership and the purpose of our token.

The Soft Cap for the ICO is set low at 100 tokens, which also ties in to and embodies our philosophy for \$tar Coin; at this level, we would have

accomplished building a community and would be able to provide the benefits and perks to community members. That said, we project seeing a much larger community by the end of the ICO. For security and prosperity of \$tar Coin, the founders are committed to retain 75% of their tokens for a minimum of one year from launch.

6. Disclaimers

All token holders must hold the indicated amount of tokens in one account for a period of no less than one month to qualify for benefits. Proof of token ownership will be required upon redemption of all benefits. Token holders must continue to hold tokens while redeeming benefits and for the duration of benefit redemption. Selling, trading, gifting or in any way losing the proper amount of tokens prior to redeeming benefits will potentially revoke access to any and all earned benefits.

We are dedicated to providing 7-day getaways for a minimum of 1 year or 2 years depending on perk tier; yet, we aim to establish the infrastructure to extend this annual benefit for additional years at no extra cost to token holders. The 7-day getaway offers access to an upscale condo located in NYC or Los Angeles for a seven day span, including a welcome package, as well as other amenities and treats.

Access to events always requires an RSVP for each respective event, including an RSVP for any guests or plus ones. Some events will be virtual, some will be pop-up events, members may RSVP conveniently via the \$tar Coin app.

ICO Exclusive perks are available only to those purchasing tokens directly from \$tar Coin via the official ICO site. That said, our aim is to potentially extend these benefits to community members beyond the ICO.

All ICO token sales are final and \$tar Coin will be disbursed to the purchaser's BNB-compatible wallet of choice at the end of the ICO. \$tar Coin may issue tokens sooner than the ICO end, so please be sure to submit a withdrawal request after purchase is approved.

Privacy policy for information collected during ICO is as follows: vital information such as physical addresses, bank information, card and payment information etc. shall be kept within the company and viewable on a need-to-know basis internally and will never be shared unless required by US Government Organizations.. Basic data such as name, email address and phone number may be used completely at the company discretion, collected and shared. To opt out and keep basic data private, you must email a letter to support@starcoinofficial.com requesting your data be kept private.

Regarding our offerings, ICO and otherwise, we reserve the right to alter price, total tokens offered to the public, any time based on our discretion for the good of the community.

Some perks and benefits may become unavailable due to force majeure, illness, death, crisis, state of emergency, global pandemic, war, travel bans or other extreme circumstances. Our goal is to avoid or circumvent said scenarios at all costs and we aim to uphold benefits promised to token holders. In extreme circumstances or scenarios, perk access may be delayed or an alternative option will be offered. The aforementioned scenarios are rare and unlikely; yet, should

they arise, we will handle each case with care, concern, compassion and communication in consideration of our valued community members.

7. Roadmap

These dates are our projected timelines for the key milestones of \$tar Coin's intended journey.

A Lifetime - Learning and Growing

Although this may be implied, we feel it's important to express the experience of \$tar Coin's founders as successful businessman and entertainment industry backgrounds. They worked hard to get past the gatekeepers and want to use their experience and success to open the doors for \$tar Coin members.

May 2021 - Taking Action

Front and back end development goes underway.

August 15, 2021 - ICO Launch

Initial Coin Offering sales go live.

October 14, 2021 - App Launch

The wallet app that can hold \$tar Coin and BNB, allow perk redemption, RSVPs for events and matchmaking networking launches.

October 15, 2021 -Token goes live

Token goes live on exchanges and ICO participants receive their tokens.

November 15, 2021 - First Concert and Event for Token Holders

\$tar Coin members will be able to RSVP to attend the first community event to be an OIL experience.

November 30, 2021 - Exclusive Members Only Event

Exclusive \$tar Coin Event for LUX, PREMIER and VIP token holders only.

October 15, 2022 - New Smart Contract App for Entertainment

Our goal is to drop a new smart contract system to fund and payroll entertainment projects ie. films, concerts, plays.

8. Final Words

\$tar Coin is an utility and inclusive pathways token on Binance Smart Chain, a first of its kind, founded by established entrepreneurs and entertainment industry professionals to open access to the world of celebrity, offer OIL experiences, establish a community that edifies its members, create a currency for members to use and establish a platform that assists ambitious professionals and entrepreneurs.
